Distributors of Oxoid Media and Reagents

Reference Letter – Quantum Biotechnologies (Pty) Ltd.

During the past two years Ripple Effect has managed tailor-made team development programs for our company. From the “Customer Service Focus” to “Quantum Leaps through Selling” and the “Make a Difference” programs I have been very impressed by the positive changes that have taken place. Individuals who were formerly shy and reserved now express their views confidently and this contributes to a more cohesive operation. We all function at a higher level.

For some, this has been a journey of discovery, for others a time of consolidation and for all an opportunity to reflect, consider realistic options and set practical and achievable goals. I have enjoyed the process immensely.

Louis has a unique talent in being able to identify with the group at all levels and his use of practical examples makes the presentations interesting and relevant. In our case the content was not only interesting and appropriate but also challenging. We look forward to continuing this journey in the future.

Dr Errol Allcock

Managing Director
