

**RE: ISOMETRIX TESTIMONIAL for THE RIPPLE EFFECT**

I attended the Ripple Wired to Influence Programme in 2015. It was an incredible learning and leadership experience.

The content and presentation of the programme was of high quality, very engaging and relevant to common business issues.

The experiences and personal stories that Louis shared during all the facilitation sessions can be directly applied to challenges that organisations face on a daily basis.

I think the most important aspects of the programme, that I learnt, was going through a “mind-shifting” phase in order to practically apply all the concepts from the training in your day-to-day activities.

The name of the programme “Wired to Influence” speaks for itself and being in an HR environment it highlighted again the importance of team dynamics, effective organisational communication and improving overall organisation effectiveness.

I can truly recommend any organisation to invest in sending all their influential team members on Ripple’s Wired to Influence training programme.

Regards

**Alide Nelson**
