

## **TESTIMONIAL**

Netology (Pty) Ltd has been working with The Ripple Effect for 6 years. When we started sending our staff on the “Wired for Change” development programme, we didn’t realise the positive impact it would have on our business. We have been able to easily integrate new staff into our business and seamlessly get the entire company pulling in the same direction. The success of the programme over the years has been a “top down” approach where change starts at the top.

We have seen our staff grow, not only in the workplace but as individuals too. It has been refreshing to see how people’s approach to problems, blame, stress and life in general has changed. The benefit to the business has been improved staff retention, less blame, people who use their initiative, better team efforts and a general sense of people who love to come to work every day.

We highly recommend The Ripple Effect as a partner to transform your business through people.
