

What did the Valley Peak Program mean to me and our business?

Very early in the course you get confronted by why you are your biggest enemy. I think the biggest obstacle I had to overcome was the fear of being successful. Why could we not go country wide with our business? Why not have increase in turnover and profit that we would never even aim for?

So how did Valley Peak help me overcome this obstacle? By helping me think differently and this ultimately bringing change in my behaviour. Have I arrived? Not even close to it! But that is actually the best part. Because of the tools and assistance with changing how we think this is now a forever thing. Not one day goes past where I'm not consciously thinking of how today, this week, this month, this year could be our best year ever.

I would definitely recommend that anyone that owns a business, manages a business and is employed by a business does this programme. When you stop investing in your education and stop learning and wanting to acquire knowledge that's the first day that you start dying.

Louis is a great facilitator. His experience in business is clear with the insight he brings to questions from different businesses and different backgrounds. Caroline is super quick to respond to emails and queries. They are lovely people to work with. And always professional.
